Applicants' arguments, filed 5/6/03, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

NEW MATTER

Claim 38 is rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 38 has been amended to cite the present of a β/β carboxamide binding pair at one of three locations symbolized by X/X notation in line 2 of claim 38. Applicants have pointed to the specification at page 7, lines 14-16, for written support for this amendment. Consideration of said page 7 citation has revealed no written support for said specific binding pair locations for the β/β carboxamide binding pair. The page 7 citation is generic regarding location and therefore lacks written support for the specific locations now amended into claim 38. This rejection is necessitated by amendment.

NON-STATUTORY SUBJECT MATTER

35 U.S.C. § 101 reads as follows:

"Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title".

Claims 1 and 42-45 are rejected under 35 U.S.C. § 101 because they are directed to non-statutory subject matter.

As summarized in the MPEP in section 2106, part IV, B, 1, the arrangement of data is nonstatutory subject matter. Instant claims 1 and 42-45 are directed to design of a polyamide which is an arrangement of data regarding monomers therein to result in the design of a polyamide. No physical process or steps are noted in said claims 1 or claims 42-45. Thus, these claims are directed to nonstatutory subject matter. It is noted, in contrast, that claim 2 at least synthesizes a polyamide. Applicants argue that the claims arrive at a specific polyamide. In response the polyamide arrived at is only data without any synthesis thereof. Applicants then argue that patent laws do not require a physical process or changes to a physical object, but then cite a legal decision and argue that the present claims involve a conversion of subject matter constituting a physical activity or objects. This is acknowledged, but that applicants have not pointed to any conversion of subject matter which constitute a physical activity or object(s). This rejection therefore is maintained and reiterated from the previous office action, mailed 2/3/03.

Claim Objections

Claims 2-5 and 46-49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.

Applicants' amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
